

AI Executive Assistant - User Guide

Overview

The **AuthiChain AI Executive Assistant** is an AI-powered content generation tool integrated into the platform. It uses **Anthropic's Claude Sonnet 4** to automate content creation across sales, marketing, customer support, NFT descriptions, and executive functions.

Quick Start

Accessing the AI Assistant

1. Navigate to the Dashboard

- URL: `https://your-domain.com/admin/ai-assistant`
- Or click **"AI Assistant"** in the admin navigation menu

2. Select a Category

- Choose from: Sales, Marketing, NFT, Support, Executive, or Utility

3. Choose an Action

- Pick the specific content type you want to generate

4. Fill in the Form

- Provide required information for context

5. Generate Content

- Click "Generate Content" and wait for AI to create your content (5-30 seconds)

6. Copy & Use

- Review, edit if needed, and copy to clipboard
-

Available Actions

Sales & Outreach

Sales Email

Generate personalized sales emails for prospects.

Required Fields:

- Prospect Name
- Company
- Title
- Industry

Optional:

- Pain Points (comma-separated)

Example Output:

Subject: Transform Your Brand Protection **with** Blockchain Authentication

Hi Sarah,

I noticed Luxury Fashion Brand Co. **is** at the forefront of digital innovation **in** fashion. With counterfeit products eroding brand value across the industry, I wanted to share how AuthiChain helps luxury brands protect their reputation **with** blockchain-verified authenticity.

Our NFT authentication platform has helped brands eliminate counterfeit losses **while** creating **new** revenue streams through verified digital certificates. Would you be open to a 15-minute call next week to explore how **this** could work **for** Luxury Fashion Brand Co.?

Best regards

Partnership Email

Generate partnership proposals for potential collaborations.

Required Fields:

- Contact Name
- Company
- Partnership Type
- Proposed Integration

Use Cases:

- Blockchain network partnerships
- Marketplace integrations
- Payment processor collaborations
- Technology partnerships

Marketing Content

LinkedIn Post

Create engaging LinkedIn posts about NFT authentication, blockchain, or Web3 topics.

Required Fields:

- Topic

Optional:

- Target Audience
- Tone (professional, conversational, thought-leader)

Best For:

- Thought leadership
- Product announcements
- Industry insights
- Brand awareness

Example Topics:

- "Why luxury brands are adopting NFT authentication"

- "The future of digital ownership"
 - "How blockchain prevents counterfeits"
 - "NFT authentication use cases in 2025"
-

Blog Post

Write comprehensive blog posts for your website.

Required Fields:

- Topic

Optional:

- Length (short: 600-800, medium: 1200-1600, long: 2200-2800 words)
- Target Keywords (comma-separated)

Includes:

- SEO-optimized headline
- Introduction with hook
- Multiple sections with subheadings
- Actionable insights
- Strong conclusion with CTA

Best For:

- SEO content
 - Educational articles
 - Industry deep-dives
 - Technical explanations
-

Social Media Content

Generate platform-specific social media posts.

Required Fields:

- Platform (Twitter, LinkedIn, Instagram, Facebook)
- Topic

Optional:

- Style (professional, casual, educational)

Platform Guidelines:

- **Twitter:** 50 words, concise, 2-3 hashtags
 - **LinkedIn:** 200 words, professional, 5 hashtags
 - **Instagram:** 150 words, visual-focused, 10 hashtags
 - **Facebook:** 120 words, conversational, 3 hashtags
-

Email Campaign

Create complete email campaigns with subject lines and body content.

Required Fields:

- Subject
- Target Audience
- Campaign Goal

Optional:

- Key Points (comma-separated)
- Tone

Includes:

- 3 subject line variations (A/B/C testing)
 - Email body (180-220 words)
 - CTA button text options
 - P.S. line
-

**NFT-Specific Content****NFT Description**

Generate compelling descriptions for NFT listings.

Required Fields:

- NFT Name
- Category
- Creator

Optional:

- Background Story
- Rarity
- Attributes (JSON or text)

Best For:

- Marketplace listings
- Auction descriptions
- Collection pages
- Social media posts

Example:

****Cyber Phoenix #42 - Ultra Rare Digital Art****

Witness the rebirth of myth in the digital age. This stunning piece from the ArtistDAO Collective captures a mythical phoenix rising through a neon-lit cyberpunk cityscape, its dynamic flames dancing with perpetual motion.

Authenticated on-chain with AuthiChain's blockchain verification, this ultra-rare masterpiece features a unique combination of Neon Cityscape background, Cyberpunk styling, and Dynamic Flame animation. Each phoenix in this collection tells a story of transformation and resilience in the digital realm.

Verified • Blockchain-Authenticated • 1 of 1

Collection Description

Generate overview descriptions for NFT collections.

Required Fields:

- Collection Name
- Theme
- Total Items
- Creator

Optional:

- Utilities (comma-separated)
- Roadmap
- Community Benefits

Best For:

- Collection landing pages
 - OpenSea descriptions
 - Marketing materials
 - Partnership proposals
-

NFT Marketing Copy

Generate purpose-specific marketing copy for NFTs.

Required Fields:

- NFT Name
- Category

Optional:

- Price
- Purpose (listing, social, email, auction)

Purpose Types:

- **Listing:** Marketplace listing that drives sales
 - **Social:** Social media announcement for launch
 - **Email:** Email campaign to collectors
 - **Auction:** Urgent, FOMO-driven auction copy
-

Customer Support

Support Response

Generate helpful customer support responses.

Required Fields:

- Category
- User Question

Optional:

- User Context (account type, platform, history)
- Urgency (low, normal, high)

Common Categories:

- NFT Minting
- Wallet Connection
- Gas Fees
- Verification Process
- Subscriptions
- Technical Issues

Example:

Hi there,

I understand the frustration with wallet connection issues 🚫 let's get you minting! Here's what to **try**:

1. ****Refresh & Retry:**** Close the browser tab completely, reopen, **and** try connecting again
2. ****Check Network:**** Ensure MetaMask is set to the correct network (Ethereum, Polygon, **or** Base)
3. ****Update MetaMask:**** Make sure you're running the latest version
4. ****Clear Cache:**** Sometimes browser cache causes connection issues

If you're on mobile, try these **steps**:

1. Open MetaMask app first
2. Then open AuthiChain in the MetaMask browser
3. Connection should be **automatic**

Still having trouble? Our support team is here to help 24/7 via live chat. We'll get you minting in no **time**!

Best regards,
AuthiChain Support Team

Onboarding Email

Create personalized onboarding emails for new users.

Required Fields:

- User Name
- Account Type (Basic, Pro, Enterprise)
- Onboarding Step

Onboarding Steps:

- **welcome:** Welcome email with platform intro
- **first_mint:** Guide to minting first NFT
- **explore_features:** Showcase advanced features
- **upgrade_prompt:** Benefits of Pro subscription

Includes:

- Personalized greeting
- Clear CTA
- Quick tips
- P.S. with resource links

FAQ Answer

Generate comprehensive FAQ answers.

Required Fields:

- Question

Optional:

- Category

Best For:

- Help center content
 - Knowledge base articles
 - Chatbot responses
 - Documentation
-

Executive & Analytics

Daily Briefing

Generate morning executive briefings with metrics and priorities.

Optional Fields (all metrics):

- NFTs Minted Yesterday
- Revenue (\$)
- Active Auctions
- New Signups
- Enterprise Leads

Includes:

1. Key Highlights (top 3 wins/concerns)
2. Today's Top 3 Priorities
3. Quick Wins (2-3 actionable items)
4. Metrics to Watch
5. Strategic Recommendation

Example:

****AUTHICHAIN DAILY BRIEFING - October 20, 2025****

****KEY HIGHLIGHTS****

- ✅ Strong minting day: 127 NFTs (+18% vs. avg)
- ✅ 3 new enterprise leads in pipeline (luxury brands)
- ⚠️ Active auctions down 12% - needs attention

****TODAY'S TOP 3 PRIORITIES****

1. Follow up with 3 enterprise leads (luxury fashion segment)
2. Launch LinkedIn campaign highlighting recent minting surge
3. Analyze auction decline - improve bidder notifications

****QUICK WINS****

- ❑ Send personalized emails to top 10 inactive Pro users
- ❑ Share "127 NFTs minted" milestone on social media
- ❑ Update pricing page with new enterprise case study

****METRICS TO WATCH****

- Auction participation rate
- Pro ❑ Enterprise conversion
- Mobile minting completion rate

****STRATEGIC RECOMMENDATION****

Focus Q4 efforts on enterprise luxury brand segment. Recent traction + upcoming holiday season = opportunity for major partnerships.

Competitor Analysis

Analyze competitors and generate positioning strategy.

Required Fields:

- Competitor Name
- Features (comma-separated)
- Pricing

Optional:

- Strengths (comma-separated)
- Weaknesses (comma-separated)
- Market Position

Includes:

1. Competitive Analysis Summary
2. AuthiChain Differentiation
3. Messaging Recommendations
4. Feature Gap Analysis
5. Pricing Strategy
6. Action Items

Utility Tools

Summarize Text

Condense long text into concise summaries.

Required Fields:

- Text to Summarize

Optional:

- Max Words (default: 100)
- Style (concise, detailed)

Best For:

- Meeting notes
 - Article summaries
 - Report condensing
 - Email digests
-

Improve Writing

Polish and enhance text for clarity and impact.

Required Fields:

- Text to Improve

Optional:

- Tone (professional, casual, technical)
- Purpose (general, marketing, technical)

Best For:

- Email drafts
 - Marketing copy
 - Documentation
 - Blog posts
-

**Pro Tips****Writing Effective Prompts**

1. **Be Specific:** More context = better results
 - ❌ Bad: "Write about NFTs"
 - ✅ Good: "Write about how luxury brands use NFT authentication to prevent counterfeits"
 2. **Provide Context:** Include relevant details
 - Target audience
 - Industry specifics
 - Pain points
 - Desired outcomes
 3. **Use Optional Fields:** They significantly improve quality
 - Pain points for sales emails
 - Keywords for blog posts
 - User context for support responses
 4. **Iterate:** If first result isn't perfect, try again with more detail
-

Best Practices

Sales & Marketing:

- Test multiple variations of sales emails
- Use LinkedIn posts to drive engagement (end with questions)
- Blog posts should target specific keywords for SEO
- Email campaigns work best with clear, single CTAs

NFT Content:

- Rich backstories make NFT descriptions compelling
- Collection descriptions should emphasize utility and uniqueness
- Auction copy should create urgency and FOMO

Support:

- Always specify urgency level for support responses
- Include user context for more personalized answers
- FAQ answers should anticipate follow-up questions

Executive:

- Daily briefings work best with real metrics
- Competitor analysis requires accurate data
- Use summaries for long reports and articles

Usage Limits & Costs

Rate Limits

- **50 requests per hour per user** (default)
- Rate limit resets every hour
- Premium users may have higher limits

API Costs

- **Input:** ~\$3 per 1M tokens
- **Output:** ~\$15 per 1M tokens
- Average request: **\$0.01-0.05**
- Most actions: **<\$0.02 per generation**

ROI Example

- Manual sales email: 15 minutes (\$12.50 at \$50/hr)
 - AI-generated: 10 seconds (\$0.02)
 - **Savings: \$12.48 per email** (99.8% cost reduction)
-

Security & Privacy

Data Security

- All API calls are server-side (no client-side API key exposure)
- User authentication required

- Rate limiting prevents abuse
- No training on your data (Anthropic policy)

Privacy

- Content is not stored permanently (unless you save it)
- No user data shared with Anthropic beyond the specific request
- Requests are logged for security and usage tracking only

Troubleshooting

Common Issues

✗ “Unauthorized - Please sign in”

- **Solution:** Log in to your AuthiChain account

✗ “Rate limit exceeded”

- **Solution:** Wait for the rate limit to reset (next hour) or contact support for higher limits

✗ “AI service configuration error”

- **Solution:** Contact support - API key may need reconfiguration

✗ “Failed to generate content”

- **Solution:** Try again or check your input fields for errors

✗ “Missing required field”

- **Solution:** Fill in all required fields marked with *

Support

Need help with the AI Assistant?

- **Documentation:** `/docs/ai-assistant`
- **Email:** `support@authichain.com`
- **Live Chat:** Available in dashboard
- **Feature Requests:** Submit via feedback form

Coming Soon

Planned features for future releases:

- **Bulk Generation:** Generate multiple items at once
- **Templates:** Save custom prompt templates
- **History:** View and reuse past generations
- **Webhooks:** Automate content generation via API
- **Multi-language:** Generate content in 20+ languages
- **Brand Voice Training:** Custom AI trained on your brand voice

- **Integration:** Export directly to email, social media, CMS
-

Example Use Cases

Use Case 1: Launch a New NFT Collection

- 1. Generate Collection Description**
 - Action: `generate_collection_description`
 - Use on: Collection landing page, OpenSea
 - 2. Create Individual NFT Descriptions**
 - Action: `generate_nft_description`
 - Use for: Each NFT in the collection
 - 3. Write Launch Blog Post**
 - Action: `generate_blog_post`
 - Topic: "Introducing [Collection Name]: The Future of [Theme]"
 - 4. Generate Social Media Content**
 - Action: `generate_social_content`
 - Platforms: Twitter, LinkedIn, Instagram
 - 5. Create Email Campaign**
 - Action: `generate_email_campaign`
 - Audience: Existing collectors and email list
-

Use Case 2: Enterprise Sales Outreach

- 1. Draft Sales Emails**
 - Action: `draft_sales_email`
 - Personalize for each prospect
 - 2. Create LinkedIn Post**
 - Action: `generate_linkedin_post`
 - Topic: "Enterprise NFT Authentication Case Study"
 - 3. Generate Partnership Email**
 - Action: `draft_partnership_email`
 - For strategic partners
 - 4. Write Blog Post**
 - Action: `generate_blog_post`
 - Topic: "Why Enterprises Choose AuthiChain"
-

Use Case 3: Improve Customer Support

- 1. Generate Support Responses**
 - Action: `generate_support_response`
 - Save as templates for common questions

2. Create FAQ Content

- Action: `generate_faq_answer`
- Build knowledge base

3. Write Onboarding Emails

- Action: `generate_onboarding_email`
- Automate user onboarding sequence
